## **01. User Design**

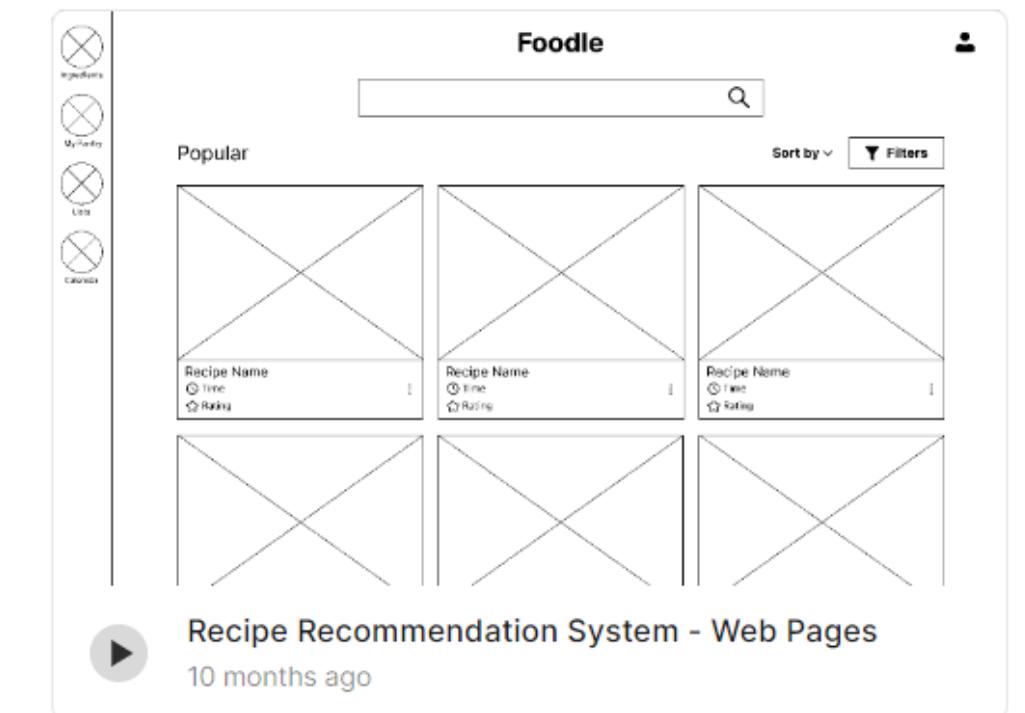

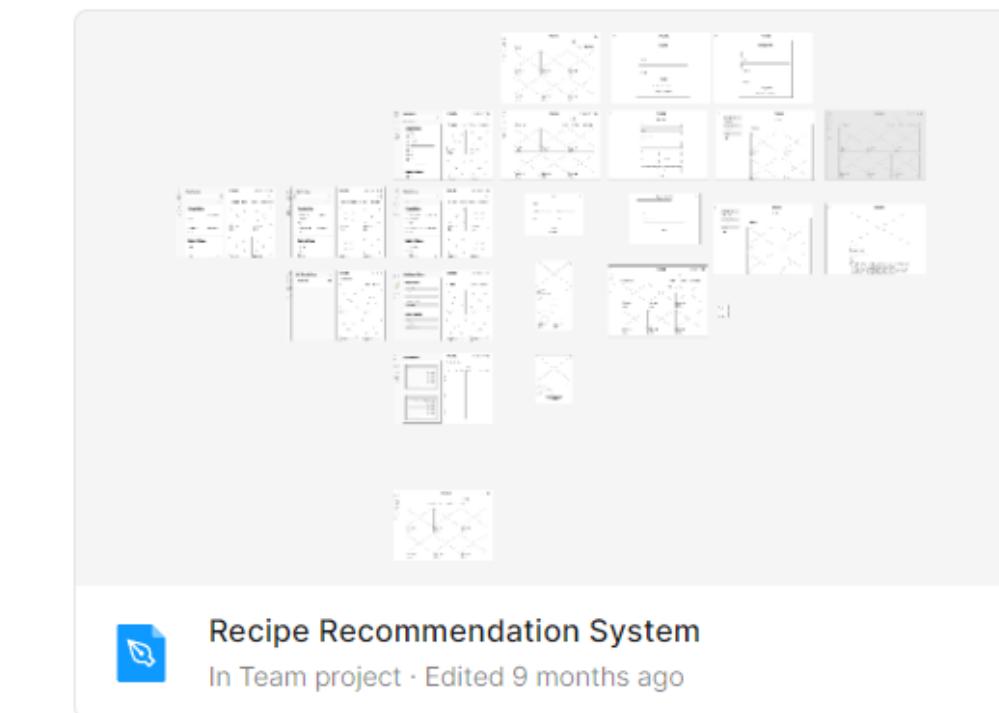

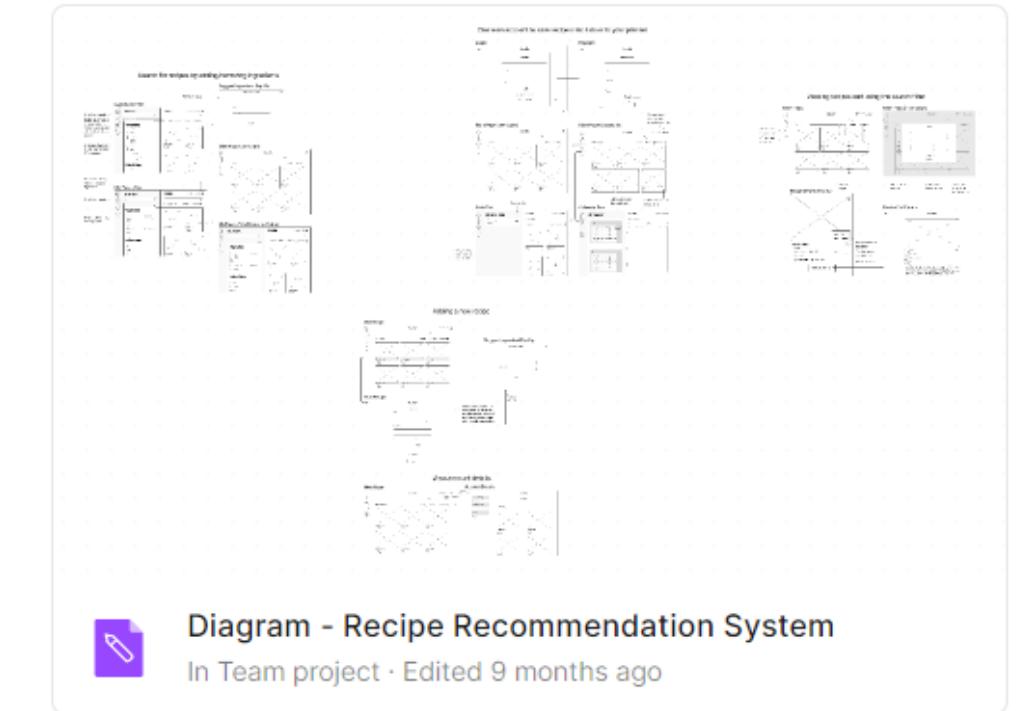

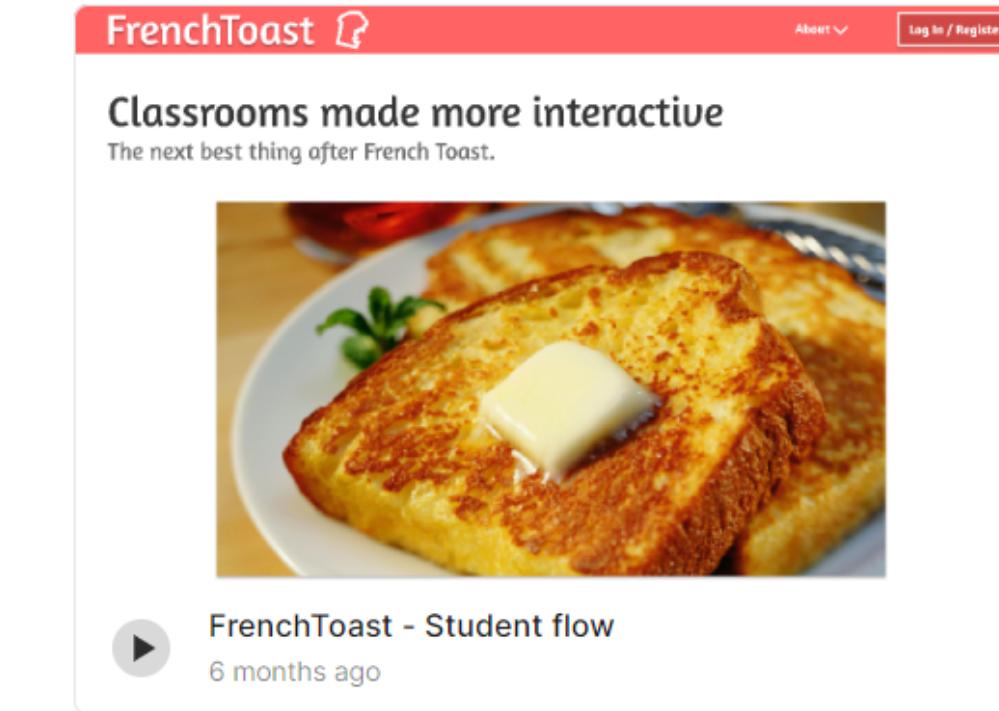

Projects using Figma, focused on UX

## **02. Visual Design**

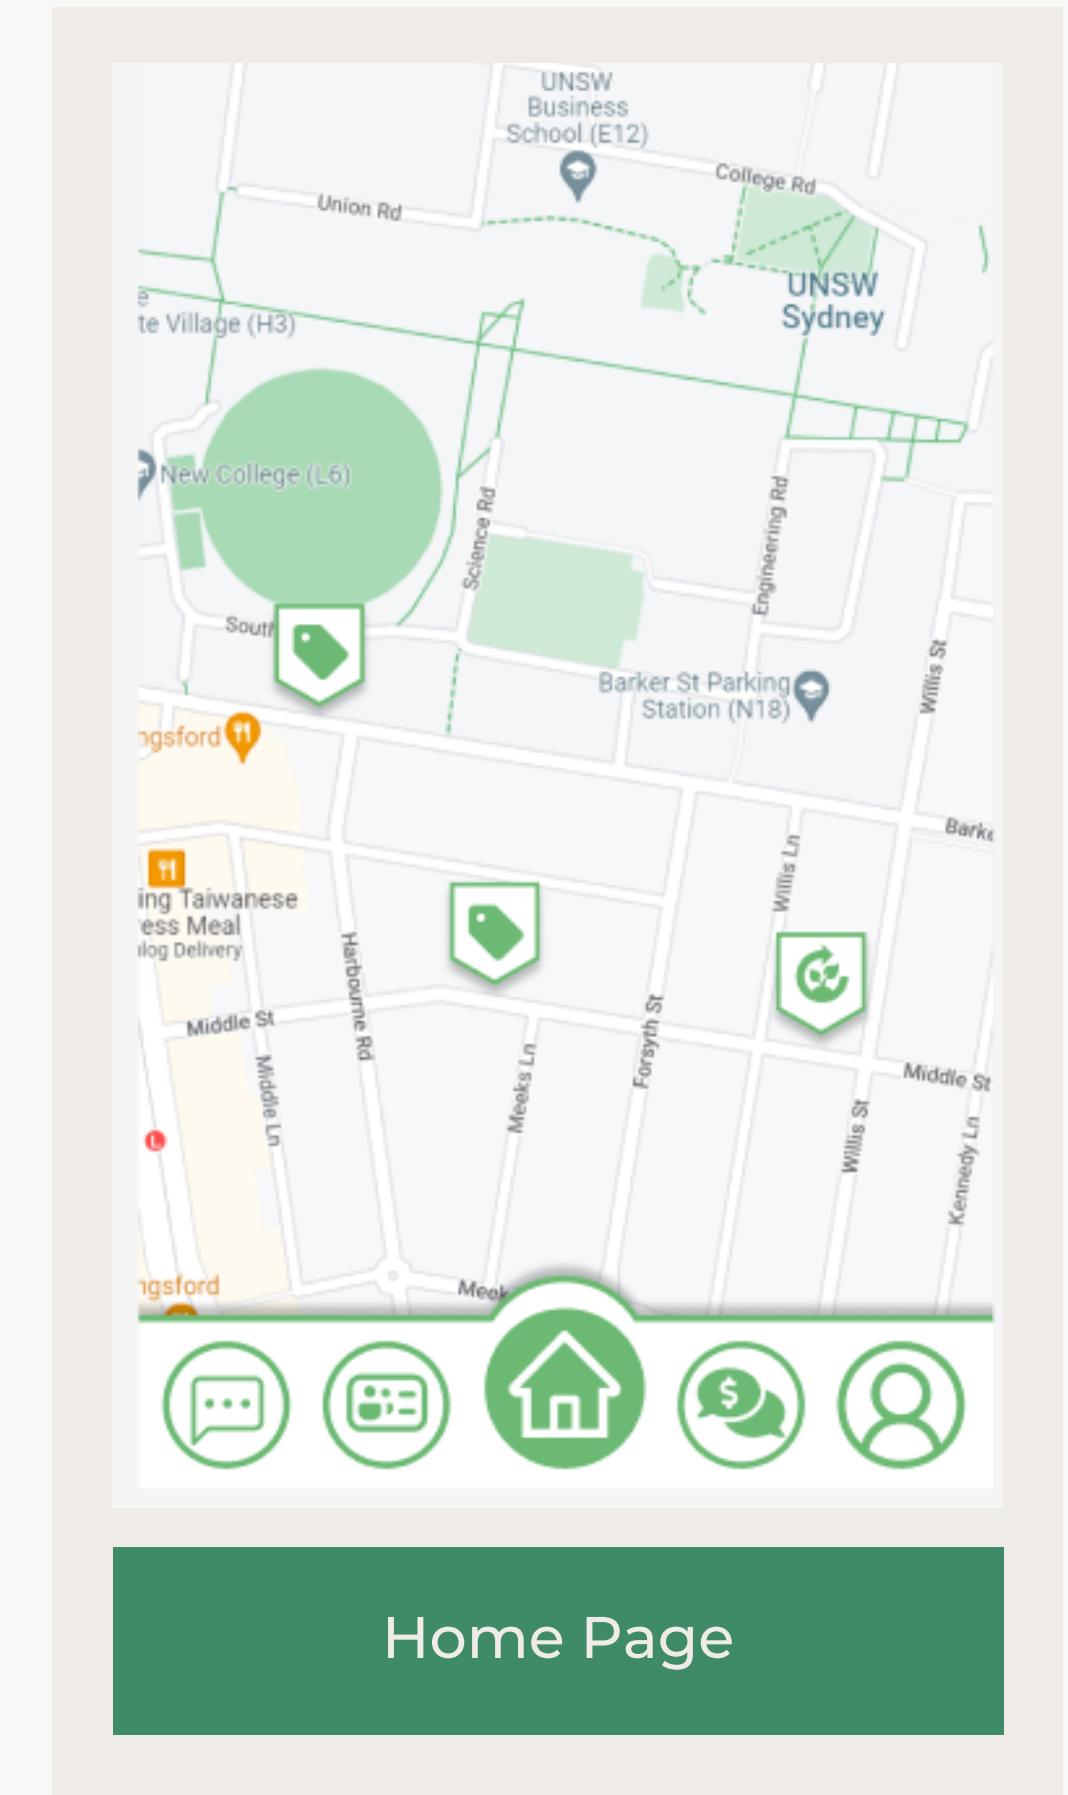

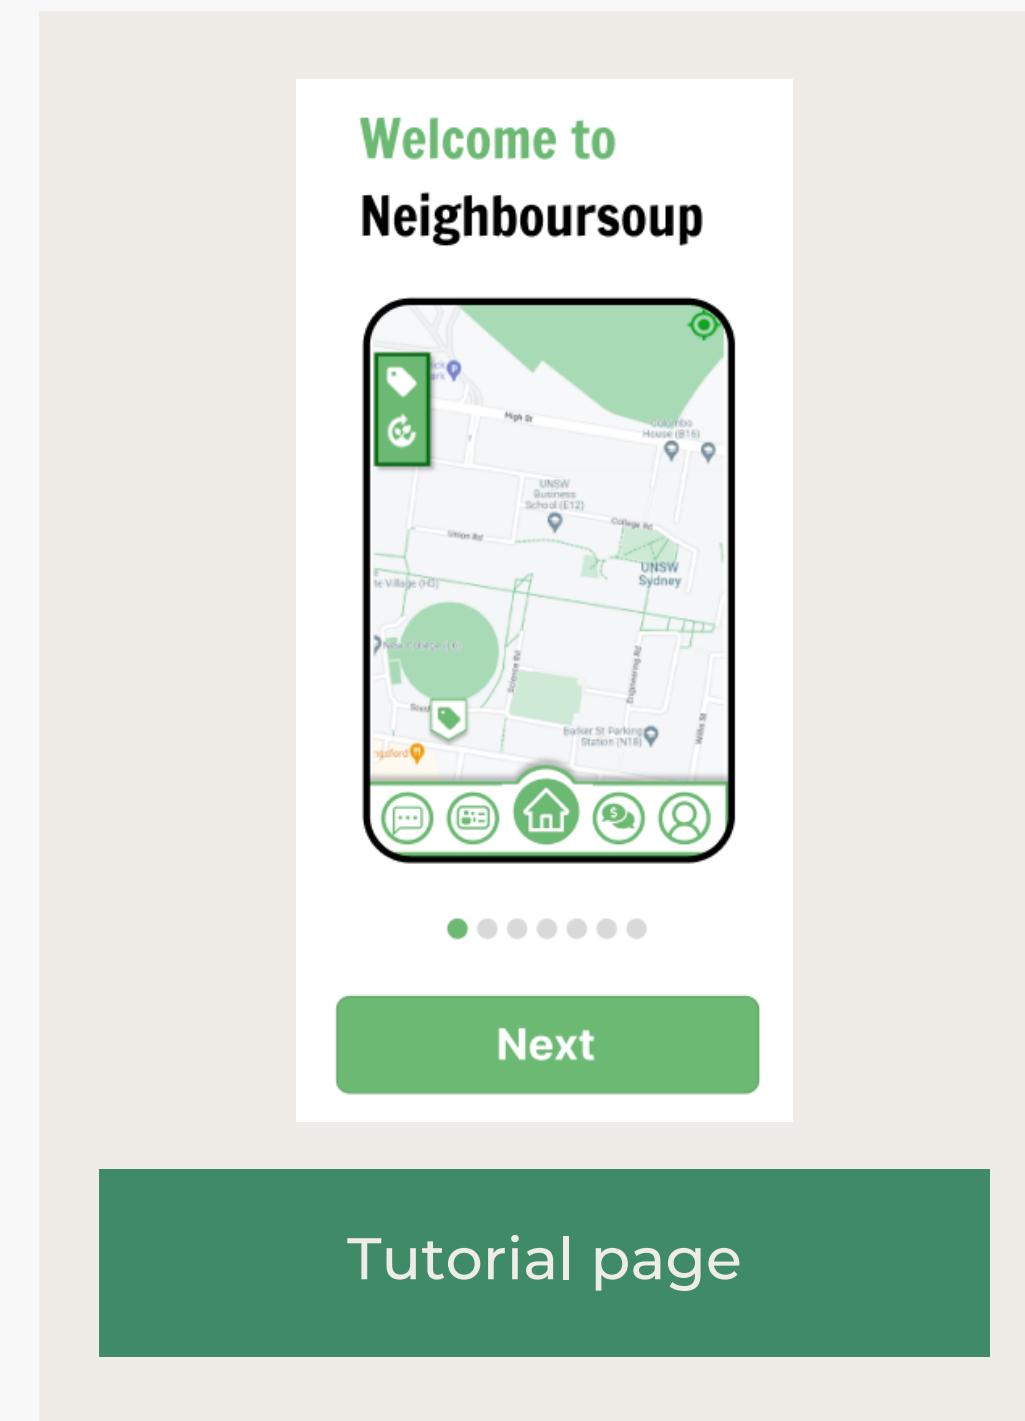

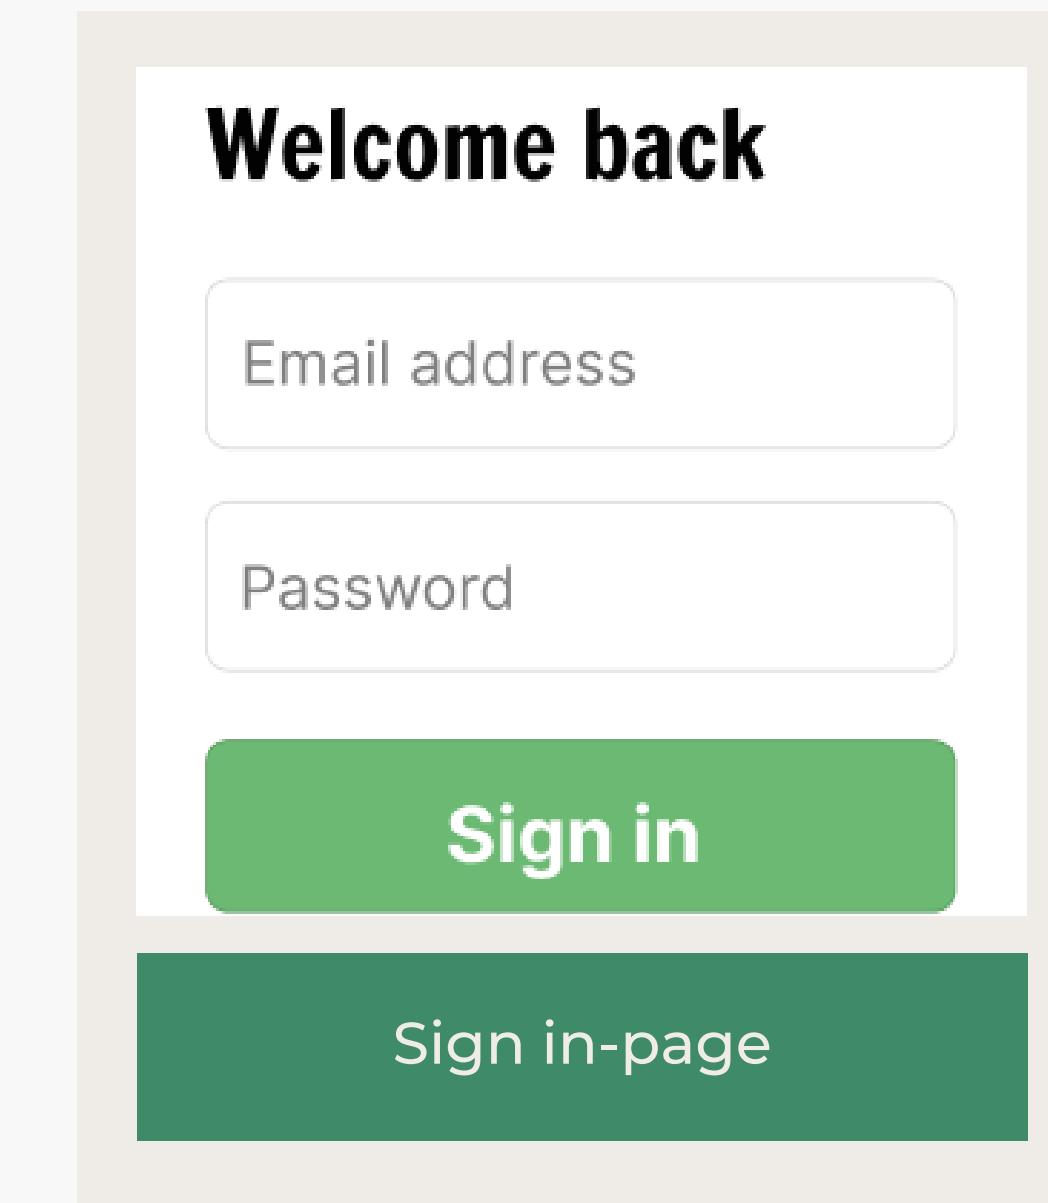

General Visual Design, including Graphic Design

# 01 USER DESIGN

# NEIGHBOURSOUP

Neighboursoup is my most recent major project in Figma, which our team created a community based foodshare/ compost app

# NEIGHBOURSOUPE

In this project I was much more comfortable using Figma, and I became more confident using the toolset.

In particular, I was managing my layers and components in cleaner ways, and better utilised different instances of them.

I am particularly proud of the Navbar that I created, which communicates its purpose and helped the team save time in the routing process.

Some icons were changed from the hi-fidelity prototype after our final round of user testing

I also attempted to unify the design elements in this project as we had many different members working on it, as there were variations in tab design, font, and sizing.

Main Page

Sidebar - Pantry

Sidebar- Calendar

# Foodle

Foodle was created for our Computer Science Capstone project, and is a recipe recommendation system which recommends recipes based on the ingredients you have available. We used Figma to prototype our website flow, primarily by myself and one other team member.

# FOODLE

These are images from our completed project!

We chose green and white as our main accent colours for a clean modern and healthy aesthetic.

The screenshot shows the Foodle recipe submission process. It consists of three main steps:

- Step 1: Select the ingredients your recipe will use**  
A dropdown menu labeled "Ingredients" is open. Below it are "CONTINUE" and "BACK" buttons.
- Step 2: We do an additional check to make sure you don't submit a recipe that already exists on this site**  
This step is currently being processed.
- Step 3: Fill in your recipe details**  
A note says "Last step".

The screenshot displays the Foodle application interface. On the left, a sidebar includes links for "Ingredients", "My Pantry", "Lists", and "Calendar". The main area shows a grid of 1012 recipes, each with a thumbnail image, title, preparation time, rating, and a heart icon for favoriting. At the bottom right, there's a calendar for August 2022.

The screenshot shows the Foodle login page. It features a "Login" header and two input fields: "Username" and "Password". Each field has a placeholder: "Please put in your username" and "Please put in your password". Below the fields is a green "LOGIN" button. At the bottom, there are links for "No Account? Register now!" and "Forgot password? Reset here!".

The screenshot shows the Foodle register page. It features a "Register" header and four input fields: "Email address", "Confirm Email address", "Username", and "Password". Each field has a placeholder: "Please put in your email", "Please confirm your email", "Please put in your username", and "Please put in your password". Below the fields are green "REGISTER" and "Already have an account? Login now!" buttons.

The screenshot shows the Foodle "My Calendar" feature. It displays a calendar for Friday, 5 August 2022, with a green box highlighting the date. To the left, a sidebar lists "Breakfast", "Lunch", and "Dinner" sections, each showing a list of recipes with thumbnails and titles. The main calendar area shows the month of August 2022 with days numbered 1 through 31.

# FRENCHTOAST

Created for Human Computer Interaction course.

We were tasked with creating an education platform for our final assessment, for which I created a majority of the Figma screens.

## GAMIFICATION OF LEARNING

Our team created a community based experience to make learning more fun! This project was greatly inspired from gather.town, where spaces are created to mimic an office simulator.

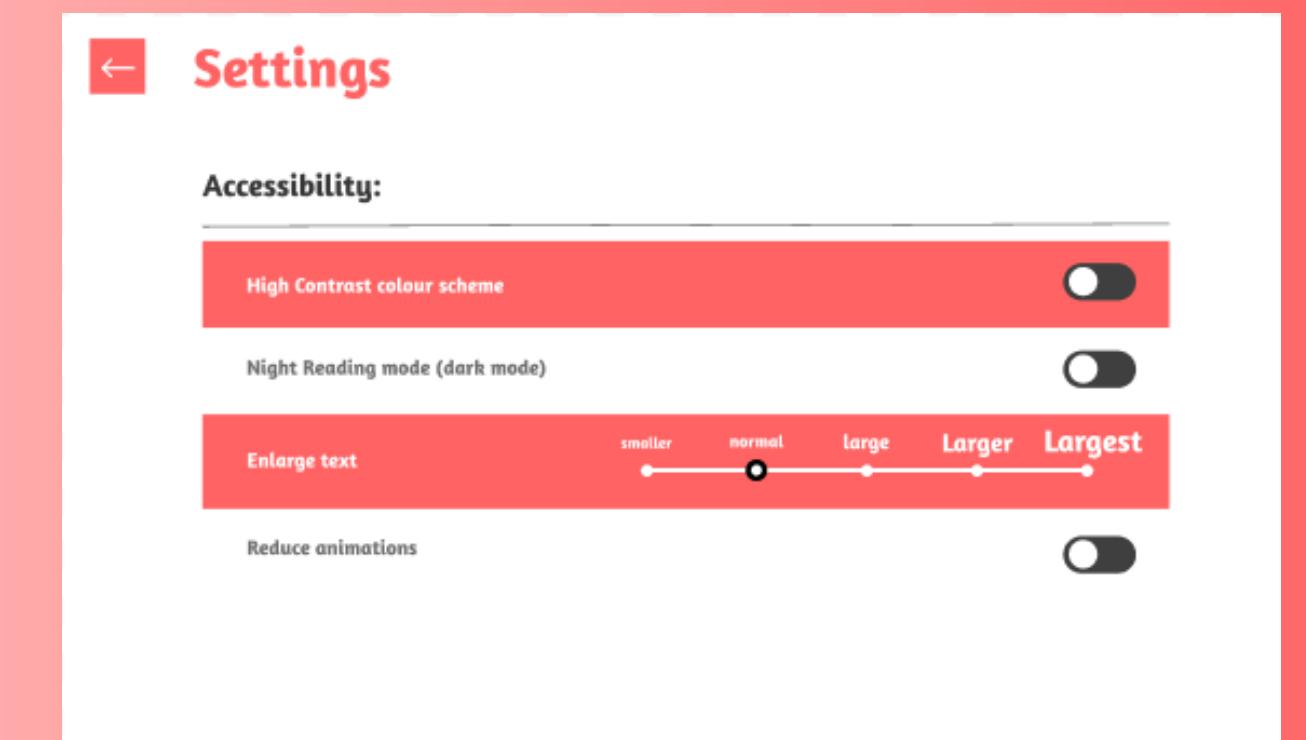

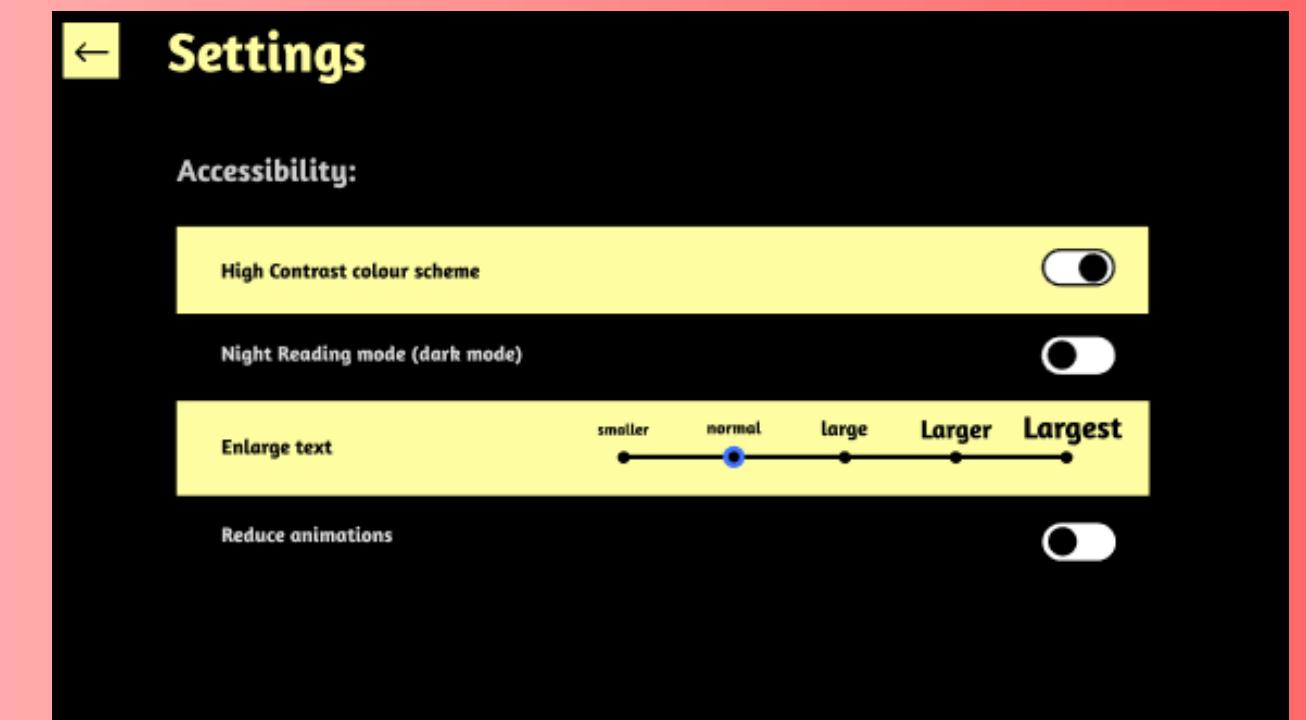

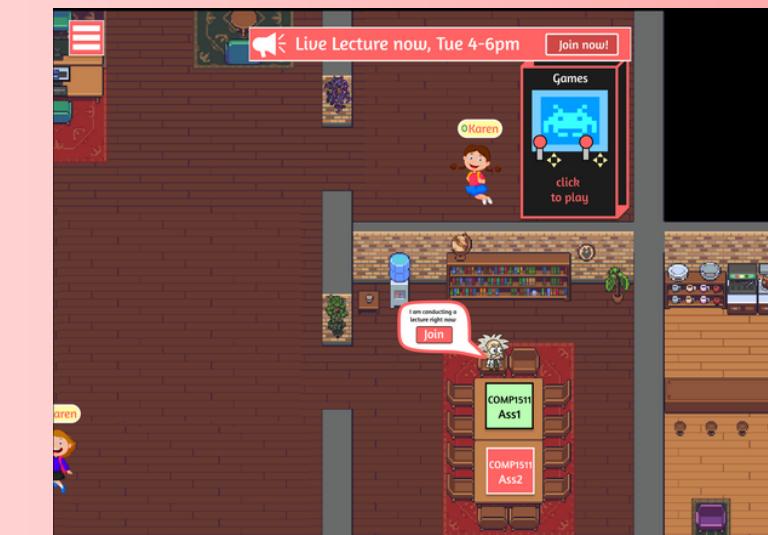

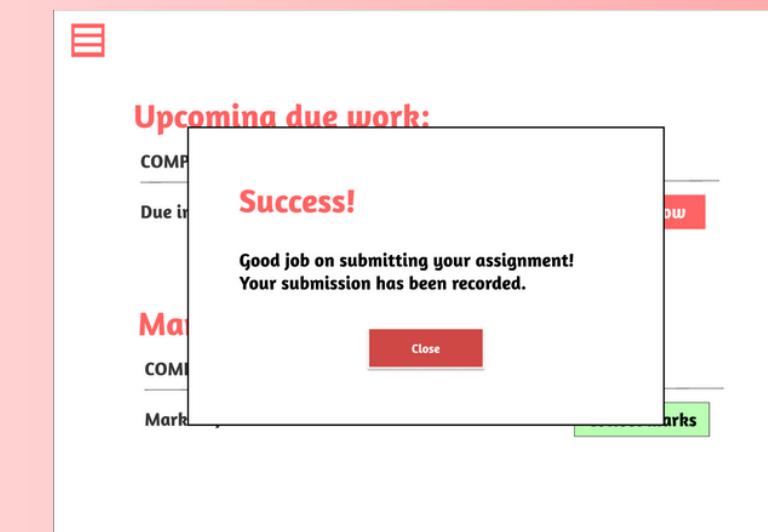

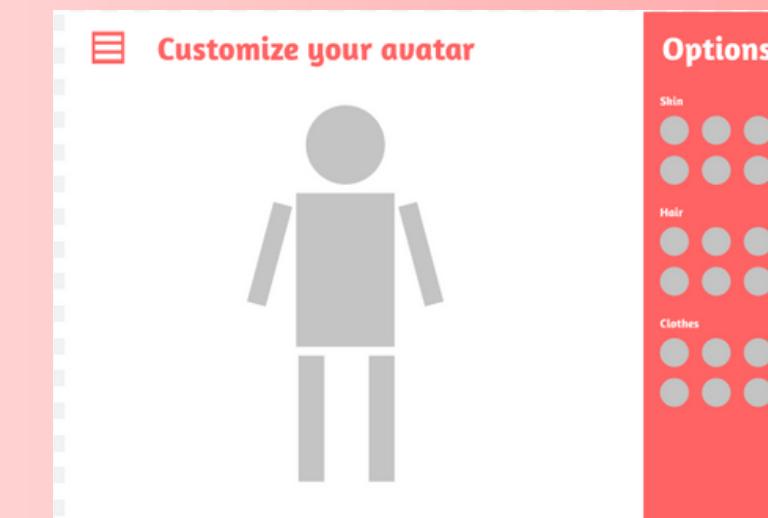

This screenshot shows a Figma wireframe of a landing page. At the top, there's a red header bar with the text "Onboarding" and "FrenchToast" next to a logo. Below the header, the main title "Classrooms made more interactive" is displayed in large, bold, black font, followed by the subtitle "The next best thing after French Toast." A large image of a plate of French toast with butter and syrup is centered below the text. In the top right corner of the main content area, there's a sidebar with a red background and white text, titled "About menu". It contains four items: "For Teachers", "For Students", "For Enterprise", and "For Fun". At the very bottom of the wireframe, there's a thin grey horizontal bar.

This screenshot shows a live version of the FrenchToast website. The layout is similar to the wireframe, with a red header bar containing "Onboarding" and "FrenchToast". The main title "Classrooms made more interactive" and subtitle "The next best thing after French Toast." are present. The image of the French toast is also here. The "About menu" sidebar is visible on the right side of the page. The overall design is clean and modern, using a red and white color scheme.

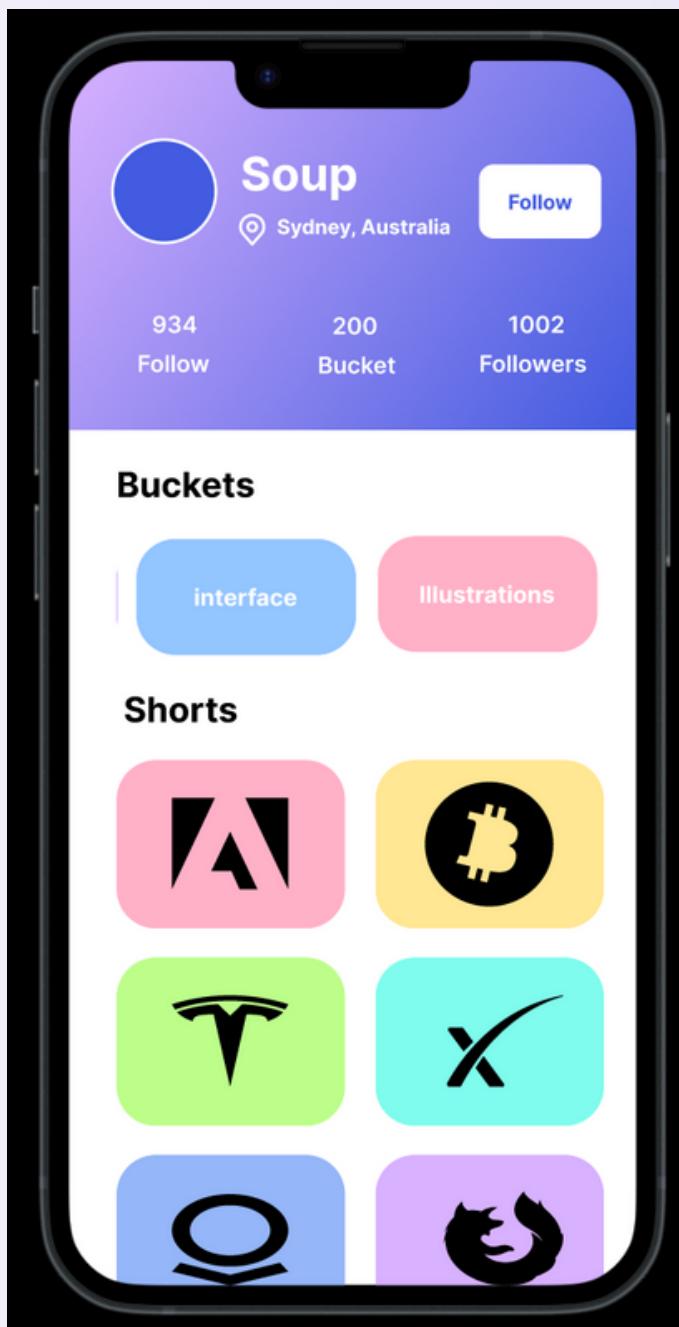

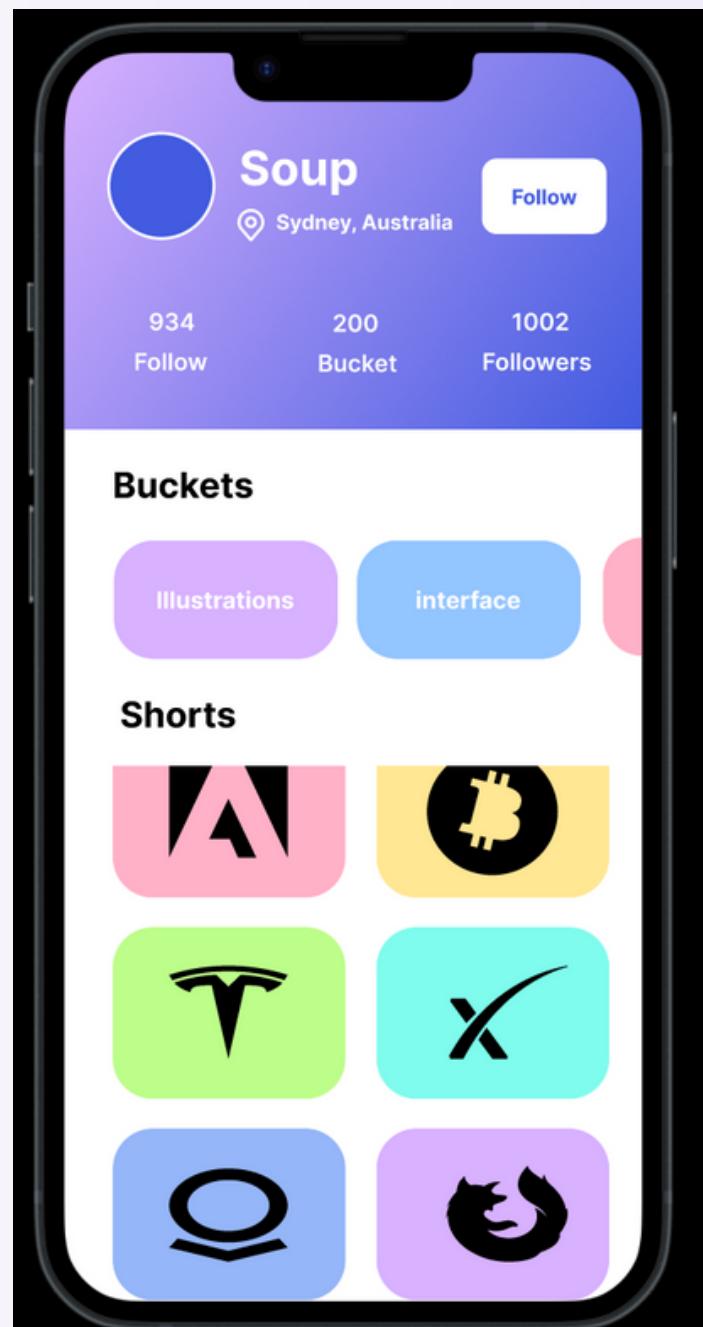

# FRENCHTOAST

This was my first project in Figma, and a great learning experience!

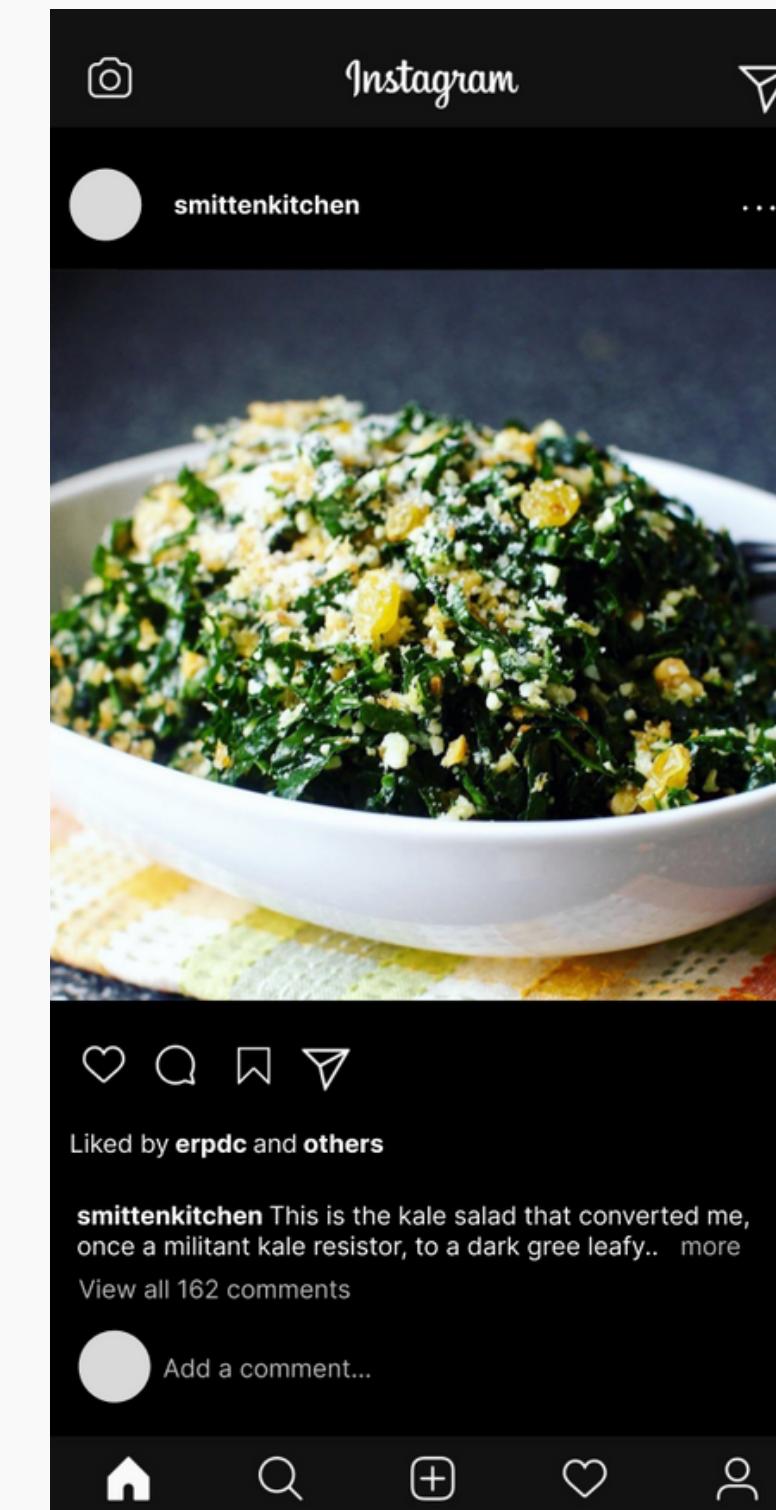

I tries to implement a consistent colour scheme and section regions accordingly, while maintaining a clean interface.

# MISCELLANEOUS DESIGNS

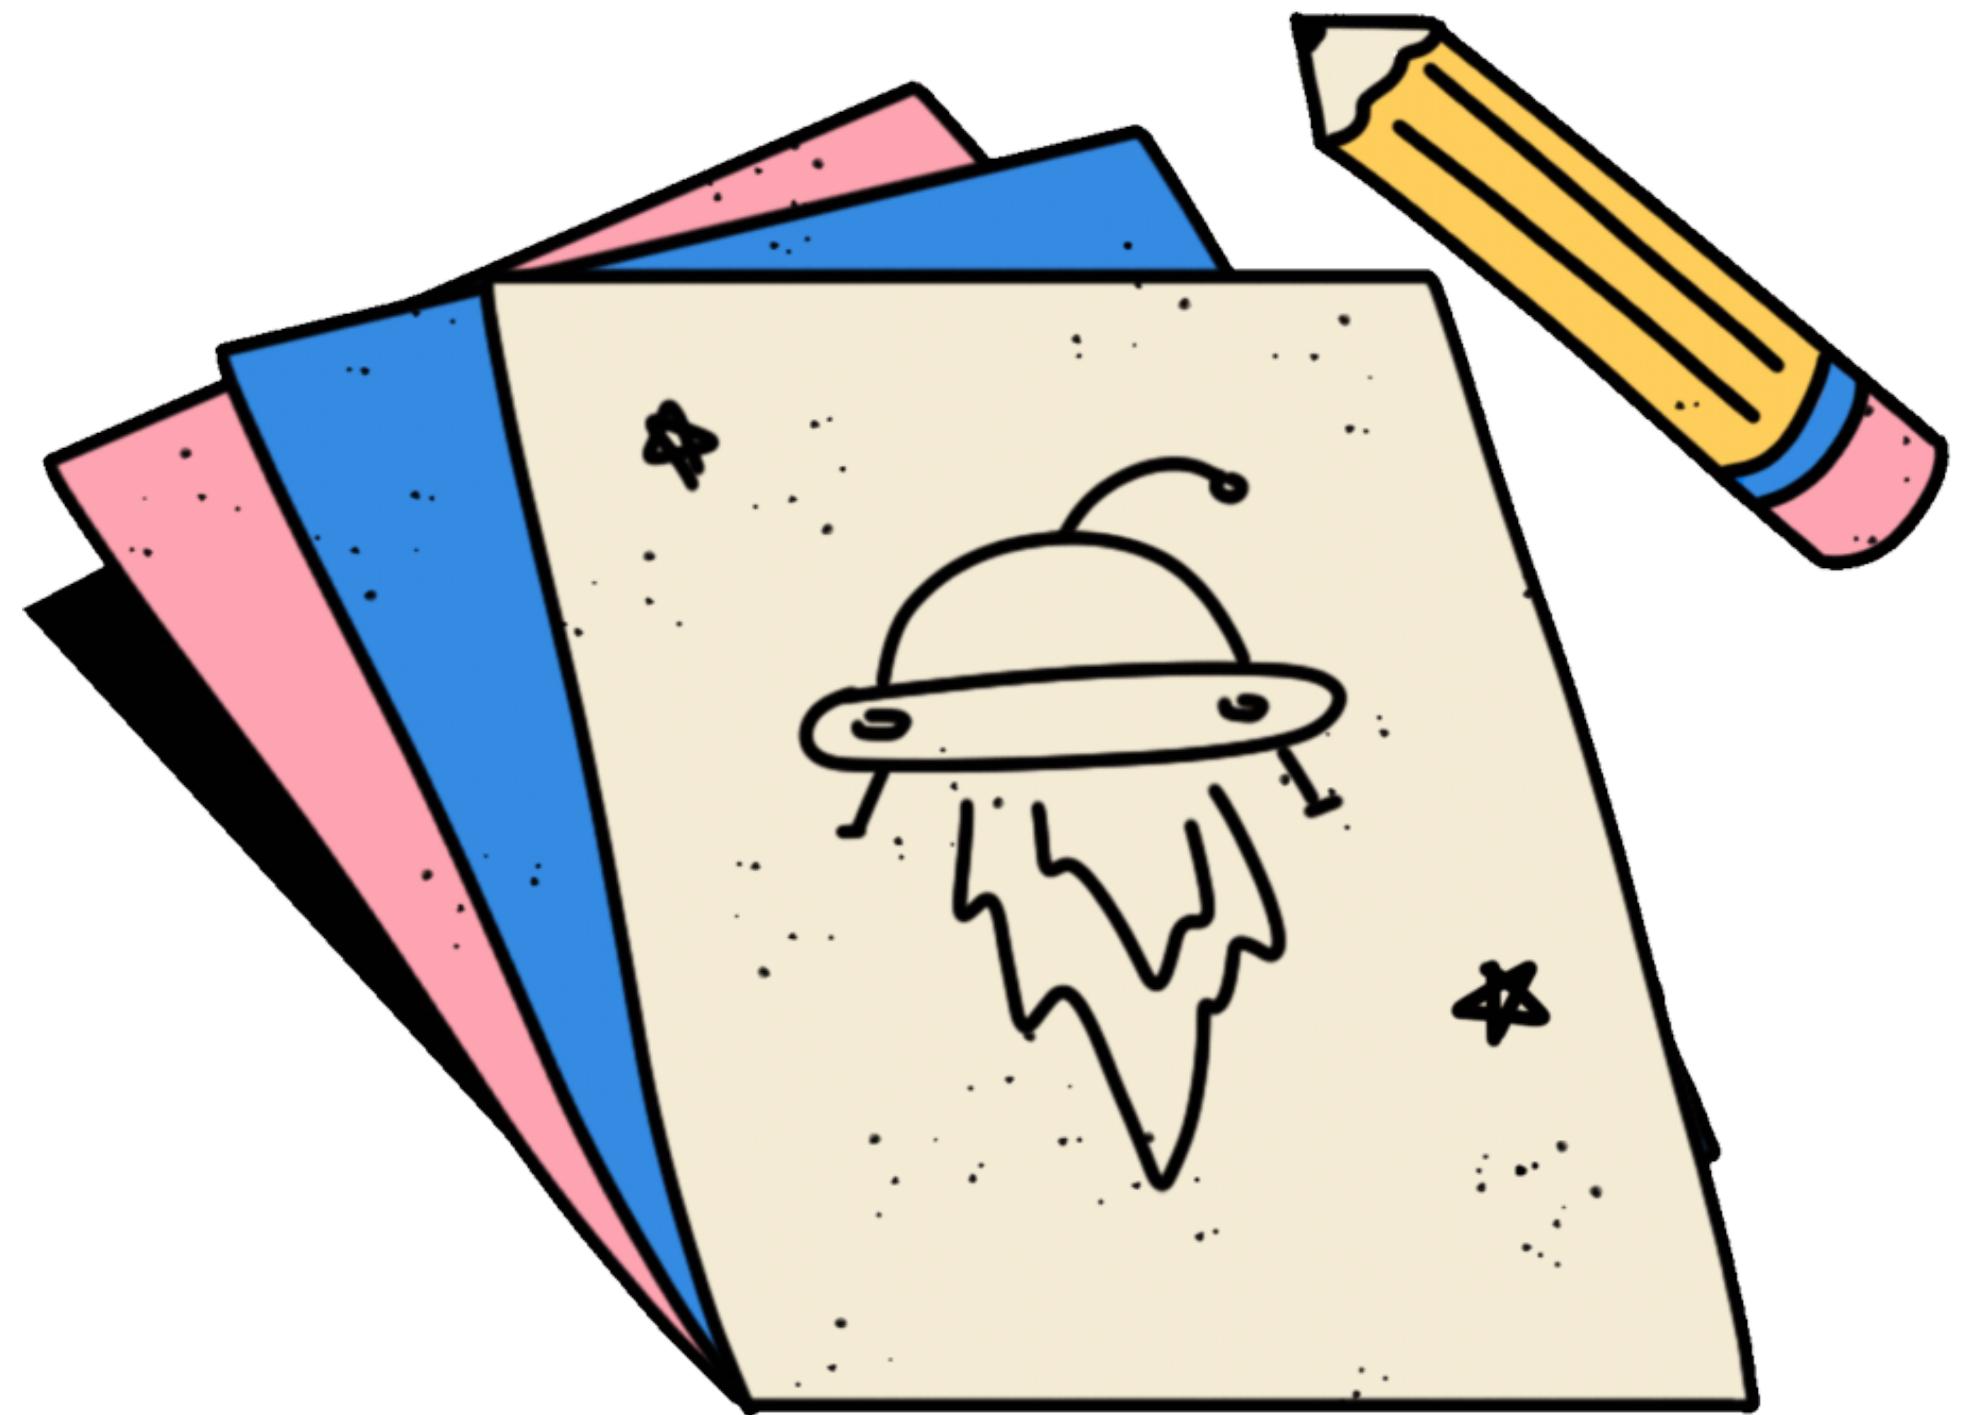

App we had to build and mimic in class, implemented with scroll functionality.

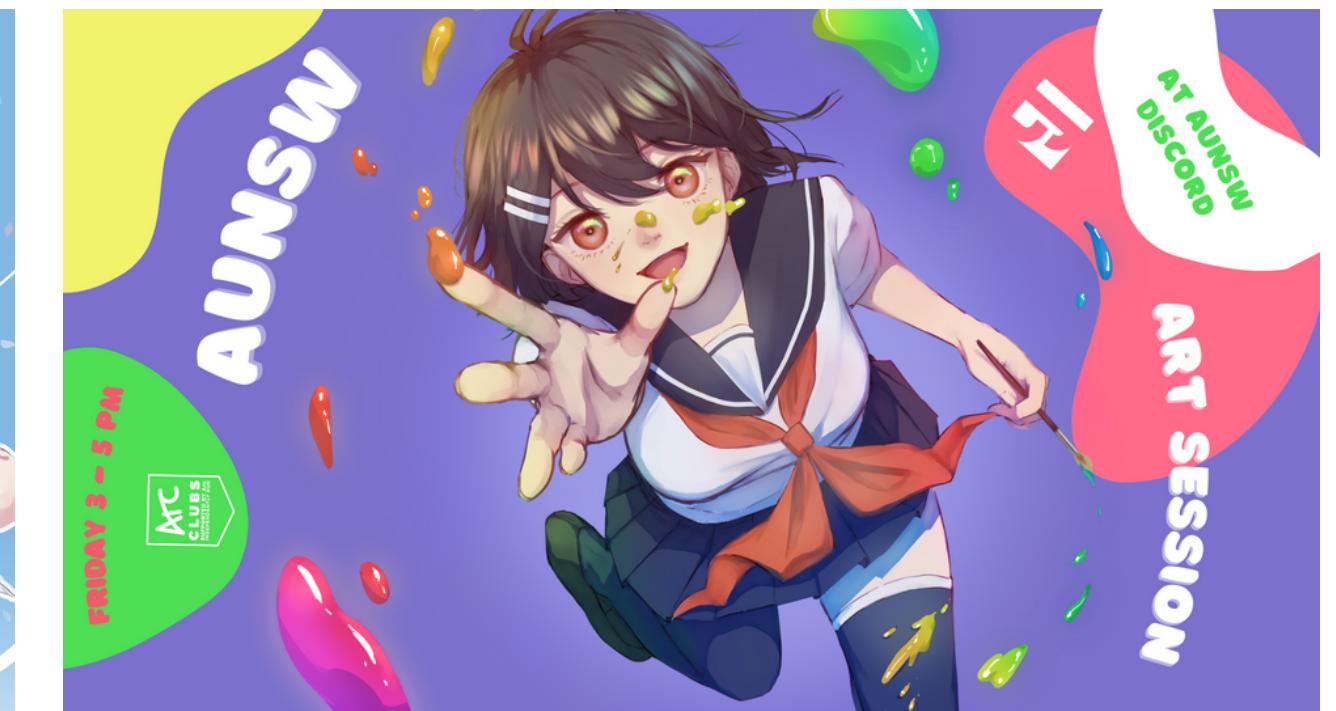

Mobile Instagram dupe created for class activity

## 02 VISUAL DESIGN

# SOCIAL MEDIA MARKETING DESIGNS

These banners / promotional material are created for my university society (AnimeUNSW) from 2021 - 2023

**AUNSW @ SMASH! スマッシュ**

**KEYCHAINS**  
\$15 each, \$25 for 2, \$40 for 4 (Mix and Match)

Genshin Impact	Hollow
Demon Slayer	

This AnimeUNSW publication is proudly supported by Arc

### Editor's intro:

Hello! How has everyone been doing in the new term? We've finally entered into the last term of the year! It's only week 2 but I am already behind on my lectures ( ;^ʌ^ )-

Without further ado; LETS GO!

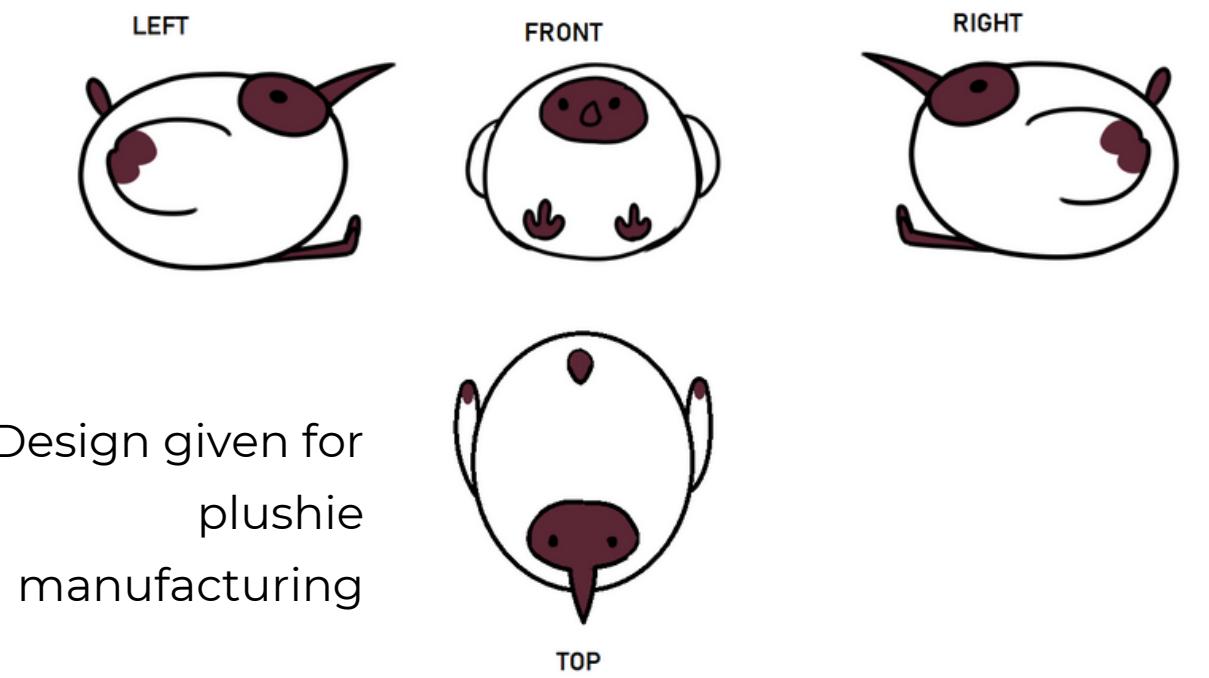

If you haven't already, join our discord as most of our events will be online for the time being: <https://discord.gg/aunsw>

Right: Original layout designed for society newsletters

# OTHER DESIGNS

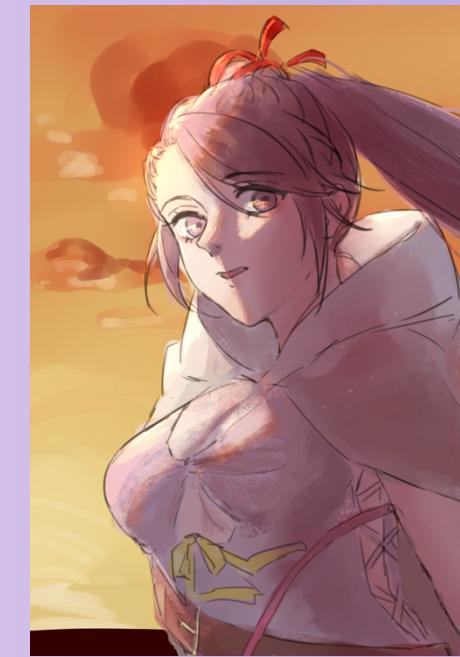

Logo created for  
Neighboursoup
